Acupunctuur - Chinese scalp acupuncture

This three-day workshop offers an immersive and hands-on exploration of scalp acupuncture, focusing on two highly effective methods for addressing various types of pain and neurological disorders, such as stroke, Parkinson's disease, multiple sclerosis, neuroskeletal conditions, movement and sensory disorders, and psychological challenges. Participants will study cranial acupuncture techniques, aimed at optimizing treatments for neurological and orthopedic rehabilitation as well as pain management.

Inhoud

Throughout the course, participants will gain practical experience in locating and puncturing points according to these two cranial acupuncture methods, while also learning their specific indications. This clinical workshop is built on 13 years of expertise integrating various cranial acupuncture techniques from Jiāo and Zhū

Doel

Over the course of three days, participants will learn and practice the locations, zones, and indications of Chinese scalp acupuncture. Each day will include hands-on practice, emphasizing scalp acupuncture zones and locations, as well as focusing on needling techniques and the underlying principles of scalp acupuncture.
